"19. The percentage of preplanned to unscheduled close air support missions flown in support of land forces." (S)

STAG Comment: (TS) The New Focus Committee reported that, because of the increased US Army activity, emphasis is shifting to immediate requests which now run as high as 30 percent as opposed to 70 percent for preplanned. The emphasis is still on preplanned missions but as the tempo of land actions increase there will be a probable further increase in immediate requests.
